

Global warming puts us all on thin ice.

THANK YOU, 170 cosponsors of global warming legislation in the U.S. House! These members are leading the fight to solve global warming and protect our children's future.

It's sink or swim time for global warming legislation. And Congress needs to lead.

If these **FINAL 50 members of the House** endorse the Safe Climate Act or the Climate Stewardship Act, we'll surpass 218—enough support to pass a bill that cuts global warming pollution by 2% per year. Each of the **FINAL 50** has supported solutions to global warming—but not yet endorsed a bill that measures up to the challenge.
